Management Report

The consolidated financial statements of British Columbia Hydro and Power Authority (BC Hydro) are the responsibility of management and have been prepared in accordance with Canadian generally accepted accounting principles, consistently applied and appropriate in the circumstances. The preparation of financial statements necessarily involves the use of estimates which have been made using careful judgement. In management's opinion, the consolidated financial statements have been properly prepared within the framework of the accounting policies summarized in the consolidated financial statements and incorporate, within reasonable limits of materiality, all information available at May 17, 2002. The consolidated financial statements have also been reviewed by the Audit & Risk Management Committee and approved by the Board of Directors. Financial information presented elsewhere in this Annual Report is consistent with that in the consolidated financial statements.

Management maintains systems of internal controls designed to provide reasonable assurance that assets are safeguarded and that reliable financial information is available on a timely basis. These systems include formal written policies and procedures, careful selection and training of qualified personnel and appropriate delegation of authority and segregation of responsibilities within the organization. An internal audit function independently evaluates the effectiveness of these internal controls on an ongoing basis and reports its findings to management and the Audit & Risk Management Committee.

The financial statements have been examined by independent external auditors. The external auditors' responsibility is to express their opinion on whether the financial statements, in all material respects, fairly present BC Hydro's financial position, results of operations and cash flows in accordance with Canadian generally accepted accounting principles. The Auditors' Report, which follows, outlines the scope of their examination and their opinion.

The Board of Directors, through the Audit & Risk Management Committee, is responsible for ensuring that management fulfills its responsibility for financial reporting and internal controls. The Audit & Risk Management Committee, comprised of directors who are not employees, meets regularly with the external auditors, the internal auditors and management to satisfy itself that each group has properly discharged its responsibility to review the financial statements before recommending approval by the Board of Directors and appointment of external auditors. The internal and external auditors have full and open access to the Audit & Risk Management Committee, with and without the presence of management.

Auditors' Report

The Lieutenant Governor in Council, Province of British Columbia:

We have audited the consolidated balance sheet of British Columbia Hydro and Power Authority as at March 31, 2002 and the consolidated statements of operations, retained earnings and cash flows for the year then ended. These financial statements are the responsibility of British Columbia Hydro and Power Authority's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of British Columbia Hydro and Power Authority as at March 31, 2002 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Significant Accounting Policies

Purpose

British Columbia Hydro and Power Authority ("BC Hydro"), established in 1962 as a Crown corporation of the Province of British Columbia (the "Province") by enactment of the Hydro and Power Authority Act, has a corporate mission to provide integrated energy solutions to its customers in an environmentally and socially responsible manner. BC Hydro is subject to regulation (see Note 1) by the British Columbia Utilities Commission (the "Commission") which, among other things, approves the rates BC Hydro charges for its services.

BC Hydro owns and operates electric generation, transmission and distribution facilities in the province of British Columbia.

Consolidation

The consolidated financial statements include the financial statements of BC Hydro and its principal wholly owned operating subsidiaries British Columbia Hydro International Limited, Powerex Corp. ("Powerex"), Powertech Labs Inc. and Westech Information Systems Inc.

Revenues

Domestic revenues comprise sales to customers within the province and sales of firm energy to those outside the province under long-term contracts which are reflected in BC Hydro's domestic load requirements. Other sales outside the province are classified as electricity trade.

Revenue is recognized on the basis of cyclical billings and also includes electricity deliveries not yet billed.

Foreign Currency Translation

Foreign currency denominated revenues and expenses are translated into Canadian dollars at the rate of exchange in effect at the transaction date. Foreign currency denominated monetary assets and liabilities are translated into Canadian dollars at the rate of exchange prevailing at the balance sheet date.

Gains and losses arising from the translation of long-term debt are deferred and amortized over the remaining term of the debt. Annual amortization is determined using a reverse sum-of-remaining-years amortization method, with straight-line amortization in the last four years.

Where foreign currency denominated long-term debt is refinanced in the same currency, any unamortized foreign currency translation gains and losses associated with the refinanced debt are amortized over the shorter of the term to maturity of the new debt or the refinanced debt. Where partial refinancing occurs in the same currency, the unamortized foreign currency translation gains or losses continue to be deferred and amortized on a pro rata basis. Where foreign currency denominated long-term debt is refinanced in a different currency, any unamortized foreign currency translation gains or losses are included in finance charges at the refinancing date.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Depreciation

Capital assets in service are depreciated on an individual or a pooled basis over the expected useful lives of the assets, generally using the straight-line method.

The expected useful lives, in years, of BC Hydro's main classes of capital assets are:

Generation	
Hydraulic	50 – 100
Thermal	10 – 50
Distribution	30 – 50
Transmission lines	35 – 100
Substations	20 – 50
Buildings	45 – 50
Equipment	3 – 20
Service vehicles	7 – 20
Sundry	20 – 45

Finance Charges Capitalized

Finance charges are capitalized on construction in progress at rates equivalent to BC Hydro's average annual cost of borrowing (2002 – 5.82 per cent, 2001 – 6.76 per cent). The rate takes into consideration annual interest costs plus foreign exchange adjustments and amortization of premiums, discounts and issue costs.

Capital Assets

Capital assets in service are recorded at cost which includes materials, direct and indirect labour, an appropriate allocation of administration overhead and finance charges capitalized during construction. Capital assets in service include the cost of plant financed by contributions in aid of construction and contributions arising from the Columbia River Treaty. Upon retirement or disposal, any gain or loss is charged to income for assets depreciated on an individual basis, or to accumulated depreciation for assets depreciated on a pooled basis.

Unfinished construction consists of construction in progress and the unamortized balance of studies and abandoned or indefinitely deferred projects. The balance includes materials, direct and indirect labour, finance charges capitalized and an appropriate allocation of administration overhead. Costs of construction in progress are transferred to capital assets in service when the asset is substantially complete and capable of operation at a significant level of capacity.

Costs of studies and abandoned or indefinitely deferred projects are deferred and amortized on a straight-line basis over five years where it is management's intention to recover the costs through future rates. If the costs of an abandoned or indefinitely deferred project will not be recovered through continuing operations, the costs related to the project, including overhead and interest during construction, are expensed immediately.

Temporary Investments

Temporary investments consist of cash and units of the short-term unitized bonds held with the Province and are valued at the lower of cost and market.

Materials and Supplies

Materials and supplies are valued at average cost less provisions for decline in value to net realizable value.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Mark-to-Market

BC Hydro follows mark-to-market accounting to value certain trading activities. Under mark-to-market accounting, these trade positions are recorded at fair value. Changes in the fair value of open positions, which result primarily from new transactions and the impact of price movements, are recognized as gains or losses in operating revenue in the period of change. The resulting unrealized gains and losses are recorded as trading assets and liabilities. The market prices used to determine fair value reflect management's best estimates considering various factors including closing exchange and over-the-counter quotations, time value and volatility factors. However, it is possible that future market prices could vary from those used in recording the assets and liabilities, and such variations could be material. Revenues and cost of purchases associated with energy marketing and trading transactions, which meet the criteria for hedges, are recognized at the time of delivery of the underlying commodity.

Demand-side Management Programs

Demand-side management ("DSM") programs comprise programs designed to reduce the energy requirements on BC Hydro's system.

Expenditures on DSM programs, including materials, direct labour and applicable portions of administration charges, equipment costs, program costs and incentives, are deferred and amortized on a straight-line basis over ten years, except for project feasibility studies which are expensed as incurred.

Incentives provided to assist in the construction of third-party electric generation facilities are deferred and amortized on a straight-line basis over the expected period of operation of the facilities.

Deferred Debt Costs

Discount and issue costs arising from debt issues are deferred and amortized on a straight-line basis over the remaining term of the debt. Premiums paid to call existing debt are deferred and amortized over the term to maturity of the new debt.

Derivative Financial Instruments

BC Hydro uses derivative financial instruments, principally interest rate and foreign currency swaps, options and forward rate agreements, solely to manage interest rate and foreign exchange risks related to debt.

Payments and receipts under interest rate and cross currency swap contracts are recognized as adjustments to finance charges. Gains and losses on terminated derivative interest rate and cross currency swaps, options and forward rate agreements are deferred and amortized over the remaining term of the related contracts.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Fair Value

The fair value of bonds, notes and debentures, and sinking funds reflects changes in the general level of interest rates that have occurred since inception. The fair value of bonds, notes and debentures is based on quoted market values or, where no such information is available, is determined by discounting the expected future cash flows of this debt at market rates for debt with similar terms and conditions. The fair value of sinking fund assets is determined by discounting the expected future cash flows of these assets at market rates for assets with similar terms and conditions.

The fair value of a derivative financial instrument reflects the amount that BC Hydro would receive (or pay) to terminate these instruments at the balance sheet date. The fair value of over-the-counter derivative contracts is determined using pricing models, which take into account market prices and contractual prices of the underlying instruments, as well as time value, yield curve and volatility factors underlying the positions.

Sinking Funds

Sinking funds are held as individual portfolios or units in a pooled bond fund. Securities included in an individual portfolio are recorded at cost, adjusted by amortization of any discounts or premiums arising on purchase on a yield basis over the estimated term to settlement of the security. Realized gains and losses are included in sinking fund income. Unrealized gains and losses are not recognized.

Units in the pooled bond fund are recorded at cost, adjusted by amortization of any realized and unrealized gains and losses on a straight-line basis over the weighted average term to maturity of the related debt portfolio.

Foreign currency translation gains and losses are deferred and amortized over the weighted average term to maturity of the related debt portfolio.

Future Removal and Site Restoration Costs

Provisions for the costs net of expected recoveries for future removal and site restoration arising on the retirement of capital assets are made where they can be reasonably estimated. These costs are charged to depreciation expense on a straight-line basis over the expected useful lives of the related assets. Provisions required are revised periodically in accordance with changes in BC Hydro's assumptions and estimates underlying the calculations and with experience arising from the removal of capital assets.

Deferred Revenue

Deferred revenue consists principally of amounts received under the Skagit River Agreements. Under these agreements, BC Hydro is required to deliver a predetermined amount of electricity each year for an 80-year period ending in fiscal 2066. In return BC Hydro receives approximately US $22 million each year for a 35-year period ending in fiscal 2020 and US $100,000 (adjusted for inflation) each year for an 80-year period ending in fiscal 2066.

The amounts received under the Skagit River Agreements are deferred and included in income on an annuity basis over the electricity delivery period ending in fiscal 2066.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Contributions

Contributions in aid of construction are amounts paid by certain customers toward the cost of capital assets required for the extension of services. These amounts are amortized over the expected useful life of the related assets.

Contributions arising from the Columbia River Treaty relate to three dams built by BC Hydro in the mid-1960s to regulate the flow of the Columbia River. The proceeds received were contributed to BC Hydro to assist in financing the dams' construction. These proceeds were deferred and are amortized to income over the period ending in fiscal 2025, the minimum term of the treaty.

Employee Benefit Plans

The cost of pensions and other post-retirement benefits earned by employees is actuarially determined using the projected benefit method prorated on service and management's best estimate of expected plan investment performance, salary escalation, retirement ages of employees and expected health care costs. For the purpose of calculating the expected return on plan assets, those assets are valued at fair value.

Past service costs from plan amendments are amortized on a straight-line basis over the average remaining service period of employees active at the date of amendment.

The excess of the net actuarial gain (loss) over 10 per cent of the greater of the benefit obligation and the fair value of plan assets is amortized over the average remaining service period of active employees. The average remaining service period of the active employees covered by the pension plan is 12 years (2001 – 12 years). The average remaining service period of the active employees covered by the other retirement benefits plan is 12 years (2001 – 12 years). When the restructuring of a benefit plan gives rise to both a curtailment and a settlement of obligations, the curtailment is accounted for prior to the settlement.

Environmental Expenditures and Liabilities

Environmental expenditures are incurred specifically to maintain or enhance the quality of the natural and social environment, or to minimize any adverse impact thereon. Environmental expenditures are expensed as part of operating activities, unless they constitute an asset improvement or act to mitigate or prevent possible future contamination, in which case the expenditures are capitalized and amortized to income. Environmental liabilities are accrued when environmental expenditures relating to activities of BC Hydro are considered likely and the costs can be reasonably estimated.

Use of Estimates

Management of BC Hydro has made a number of estimates and assumptions relating to the reporting of assets and liabilities and to the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with generally accepted accounting principles. Actual results could differ from these estimates.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Note 1: Regulation

BC Hydro is regulated by the Commission, and they are both subject to general or special directions issued by order of the Province. Orders in Council from the Province establish the basis for determining BC Hydro's allowed return on equity, calculation of its revenue requirements, rates charged to customers and the annual Payment to the Province.

Payment to the Province

BC Hydro is required to make an annual Payment to the Province on or before June 30 of each year, with respect to the financial results of the most recently completed fiscal year. The payment equals 85 per cent of BC Hydro's distributable surplus provided the debt:equity ratio of BC Hydro after deducting the payment is not greater than 80:20.

Distributable surplus is calculated as consolidated net income adjusted by deducting finance charges capitalized during the year, net of depreciation charged on capitalized finance charges. Equity is calculated as the sum of retained earnings, the Rate Stabilization Account, deferred revenue, contributions arising from the Columbia River Treaty and contributions in aid of construction at the end of the fiscal year. Debt is calculated as the sum of revolving borrowings, bonds, notes and debentures, net of related sinking funds, temporary investments and repurchased debt at the end of the fiscal year.

Revenue Requirements, Return on Equity and Rates Charged to Customers

The Commission is required to ensure electricity rates are sufficient to allow BC Hydro to achieve an annual rate of return on equity equal to the return allowed, on a pre-income tax basis, by the most comparable investor-owned energy utility regulated under the Utilities Commission Act. The allowed annual rate of return on equity calculated for 2002 is 15.24 per cent (2001 – 16.59 per cent). Average electricity rate increases for each year are limited to the projected rate of inflation for British Columbia plus two percentage points. For rate setting purposes, the rate of return on equity projected to be achieved by BC Hydro is determined after taking into account any available transfer from the Rate Stabilization Account.

BC Hydro's basic tariffs for all customers have been frozen until March 31, 2003.

Rate Stabilization Account

The current Rate Stabilization Account was established on March 30, 2000, to mitigate the impact of volatile earnings on ratepayers. Transfers are made to the Rate Stabilization Account during high-income years to reduce the need for rate increases in lower-income years.

Where consolidated net income, before any Rate Stabilization Account transfers, is greater than the amount needed by BC Hydro to achieve the annual rate of return on equity allowed by the Commission, then consolidated net income is decreased accordingly by an appropriate transfer to the Rate Stabilization Account.

Where consolidated net income, before any Rate Stabilization Account transfers, is less than the amount needed to achieve the allowed rate of return on equity, then consolidated net income is increased by a transfer from the Rate Stabilization Account. Transfers from the Rate Stabilization Account are subject to a positive balance existing in the account, provided BC Hydro's debt:equity ratio, after the transfers, is not greater than 80:20.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Note 2: Energy Costs

(in millions)	2002	2001
Water rentals	$ 228	$ 255
Electricity purchases	3,638	4,158
Fuel	280	456
Third-party transmission charges	255	287
Compensation and mitigation costs	6	6
	$4,407	$5,162

Electricity purchases include $356 million (2001 – $677 million) in energy transactions with the Province related to Canadian Entitlement energy under the Columbia River Treaty. These energy transactions are in the normal course of operations and are recorded based on market prices.

Note 3: Depreciation and Amortization

(in millions)	2002	2001
Depreciation of capital assets in service	$ 363	$ 348
Amortization of contributions arising from the Columbia River Treaty and contributions in aid of construction	(42)	(41)
Amortization of studies and abandoned or indefinitely deferred projects	7	8
Amortization of demand-side management programs	28	31
Future removal and site restoration costs	21	20
Capital asset write-offs	9	14
	$ 386	$ 380

Note 4: Taxes

(in millions)	2002	2001
School taxes and grants	$ 140	$ 137
Corporation capital taxes and other	26	37
	$ 166	$ 174

School taxes and grants and corporation capital taxes are paid to the Province unless otherwise noted. School taxes of $35 million (2001 – $34 million) and grants of $38 million (2001 – $37 million) were paid to municipalities and regional districts. All school taxes paid to municipalities and regional districts are remitted to the Province. As a Crown corporation, BC Hydro is exempt from Canadian federal and provincial income tax.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Note 5: Finance Charges

(in millions)	2002	2001
Interest on debt securities – bonds, notes and debentures	$ 568	$ 631
– revolving borrowings	3	8
Amortization of deferred debt costs and other expenses	65	51
	636	690
Less:		
Sinking fund income	(58)	(76)
Other income	(18)	(42)
Finance charges capitalized to unfinished construction	(16)	(13)
	(92)	(131)
	$ 544	$ 559

Included in interest on debt securities is $557 million (2001 – $596 million) in interest paid to the Province.

Note 6: Customer Profit Sharing

On February 7, 2001, under an Order in Council, the Province directed BC Hydro to pay its residential tariff customers, UtiliCorp Networks Canada (formerly West Kootenay Power) and the Corporation of the City of New Westminster payments equivalent to $200 per residential customer. These payments totaling $310 million were deducted from income in fiscal 2001.

Note 7: Capital Assets

(in millions)	2002				2001			
	Capital Assets in Service	Accumulated Depreciation	Unfinished Construction	Composite Depreciation Rate	Capital Assets in Service	Accumulated Depreciation	Unfinished Construction	Composite Depreciation Rate
Generation								
Hydraulic	$ 5,142	$ 1,570	$ 110	1.5%	$ 5,105	$ 1,495	$ 69	1.5%
Thermal	399	193	77	3.4	369	181	37	3.3
	5,541	1,763	187		5,474	1,676	106	
Distribution	3,258	1,073	101	2.6	3,142	1,003	77	2.5

	1,184	557	84		1,136	509	35	
Total	$ 14,608	$ 5,557	$ 459		$ 14,323	$ 5,256	$ 294	

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Note 8: Sinking Funds

Sinking funds are held by the Trustee (the Minister of Finance for the Province) for the redemption of long-term debt. Sinking fund income is recorded as a reduction of finance charges.

The sinking fund balances at the balance sheet date include the following investments:

(in millions)	2002		2001	
	Carrying Value	Weighted Average Effective Rate[1]	Carrying Value	Weighted Average Effective Rate[1]
Money market unitized funds[2]	$ 239	2.1 %	$ 354	5.0 %
Province of BC and BC Crown Corporation bonds	494	3.1	512	5.7
Federal and other provincial government securities	340	5.8	282	5.6
	$1,073		$1,148	

[1] *Rate calculated on market yield to maturity.*

[2] *Investments held in money market unitized funds consist of federal and provincial government paper and high-grade commercial paper with a maturity of one year or less.*

Fair value information for sinking funds is presented in Note 11.

Sinking Fund Requirements

Substantially all of BC Hydro's debt issues have annual sinking fund cash requirements. The annual sinking fund cash requirements for the next five years are:

(in millions)	2003	2004	2005	2006	2007
Canadian	$45	$41	$36	$34	$29
US	$6 (C$9)	$6 (C$9)	$6 (C$9)	$6 (C$9)	$6 (C$9)

Note 9: Deferred Debt Costs

(in millions)	2002	2001
Unrealized foreign exchange losses	$ 492	$ 517
Discount and issue costs	95	116
	$ 587	$ 633

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Note 10: Long-Term Debt and Debt Management

BC Hydro's long-term debt comprises bonds, notes and debentures, substantially all of which have annual sinking fund requirements (see Note 8), and revolving borrowings obtained under an agreement with the Province. BC Hydro's debt is either held or guaranteed by the Province.

Under the Hydro and Power Authority Act, BC Hydro is subject to a borrowing limit of $8,800 million after deduction of sinking funds. As at March 31, 2002, BC Hydro's total debt under the borrowing limit totaled $6,906 million (2001 – $6,900 million).

During fiscal 2002, BC Hydro issued bonds and debentures totaling $350 million (2001 – $450 million) with a weighted average effective interest rate of 5.1 per cent (2001 – 6.5 per cent) and a weighted average term to maturity of 18.3 years (2001 – 19.7 years).

Long-term debt, expressed in Canadian dollars, is summarized in the following table by year of maturity.

(in millions)	2002				2001	
	Canadian	Foreign	Total	Weighted Average Interest Rate[1]	Total	Weighted Average Interest Rate[1]
Maturing in fiscal:						
2002	$ –	$ –	$ –	–%	$ 404	9.3%
2003	–	446	446	7.0	441	7.0
2004	300	–	300	8.0	300	8.0
2005	388	196	584	7.6	514	9.0
2006	313	247	560	5.1	483	6.5
2007	314	287	601	3.9	–	
Total 1 – 5 years	1,315	1,176	2,491	6.1	2,142	7.9
6 – 10 years	827	558	1,385	6.9	1,927	7.4
11 – 15 years	350	598	948	4.4	1,210	6.6
16 – 20 years	896	–	896	10.6	600	10.7
21 – 25 years	400	797	1,197	7.5	1,485	8.0
26 – 30 years	400	–	400	6.3	–	–
Over 30 years	–	478	478	7.4	673	7.1
Bonds, notes and debentures	4,188	3,607	7,795	6.8	8,037	7.8
Revolving borrowings	168	16	184	2.0	11	5.0
	$ 4,356	$ 3,623	7,979		8,048	
Less: Current portion			630		415	
Long-term debt			$ 7,349		$ 7,633	

[1] *The weighted average interest rate represents the effective rate of interest on fixed-rate bonds and notes and the current interest rate in effect at March 31 for floating-rate bonds and notes, all before considering the effect of derivative financial instruments used to manage interest rate risk.*

Under an agreement with the Province, BC Hydro indemnifies the Province for any credit losses incurred from contracts entered into by the Province on BC Hydro's behalf. BC Hydro has not experienced any losses due to the indemnity.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

The following interest rate contracts were in place at March 31, 2002 and 2001, with a carrying value of nil at both dates. Average variable rates are based on the effective rates at the balance sheet date and vary over time.

(dollar amounts in millions)	**2002**	2001
Receive fixed, pay floating rate swaps		
Notional amount[1]	**$ 1,267**	$ 915
Weighted average receive rate	**5.59%**	5.95%
Weighted average pay rate	**2.13%**	5.06%
Remaining terms	**4 years**	1 year
Receive floating, pay fixed rate swaps		
Notional amount[1]	**$ 1,210**	$ 331
Weighted average receive rate	**2.04%**	6.51%
Weighted average pay rate	**3.70%**	6.28%
Remaining terms	**1 year**	4 years

[1] *Notional amount for a derivative instrument is defined as the contractual amount on which payments are calculated.*

The following foreign currency contracts with a net carrying value of $16 million (2001 – $19 million) were in place at March 31, 2002 and 2001. Such contracts are used to hedge foreign dollar principal and interest payments.

(dollar amounts in millions)	**2002**	2001
Cross Currency Swaps[1]		
BC Hydro receives foreign currency:		
United States dollar – notional amount[2]	**US $243**	US $195
United States dollar – weighted average exchange rate	**1.42**	1.39
Remaining term	**4 years**	5 years
Japanese yen – notional amount[2]	**¥ 10,000**	¥ 10,000
Japanese yen – weighted average exchange rate	**0.0135**	0.0135
Remaining term	**2 years**	3 years

[1] *Under these arrangements, BC Hydro receives or pays the foreign currency in exchange for Canadian currency.*

[2] *Notional amount for a derivative instrument is defined as the contractual amount on which payments are calculated.*

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Total long-term debt, sinking funds and foreign currency contracts are stated in the following table showing the Canadian dollar equivalent of the currency in which they are payable.

(in millions)	2002						2001
	In Currency Units	At the closing exchange rates at the balance sheet date (C$)	Foreign Currency Contracts	Sinking Funds	Net Principal Outstanding Before Hedging	Net Principal Outstanding After Hedging	Net Principal Outstanding After Hedging
Canadian	$ 4,356	$4,356	$ –	$ (401)	$ 3,955	$ 4,561	$4,287
US	$ 2,151	3,427	(30)	(661)	2,736	2,329	2,594
Structured Yen	¥ 10,000	120	15	(11)	124	–	–
Structured US	$ 48	76	(1)	–	75	–	–
Long-term debt		$7,979	$ (16)	$ (1,073)	$ 6,890	$ 6,890	$6,881

Foreign Debt Management

As at March 31, 2002, BC Hydro hedged US dollar debt, including sinking funds and cross currency swaps totaling US $710 million with a Canadian dollar equivalent of $1,101 million (2001 – US $581 million with a Canadian dollar equivalent of $888 million). This results in a net foreign currency exposure of US $1,440 million (2001 – US $1,641 million) with a Canadian dollar equivalent of $2,295 million (2001 – $2,589 million).

Revolving Borrowings

Revolving borrowings outstanding at March 31, 2002 have a weighted average remaining term to maturity of 70 days (2001 – 85 days). The authorized commercial paper borrowing program, which includes revolving borrowings, is limited to $1,400 million under the Fiscal Agency Agreement. Interest is charged based on prevailing money market rates.

Redeemable by the Bond Holder

Certain debt held by the Canada Pension Plan Investment Fund and by the Minister of Finance for the Province contains provisions allowing holders to redeem the debt prior to maturity, in whole or in part, subject to certain restrictions. At March 31, 2002 this debt totaled $233 million (2001 – $242 million), net of related sinking funds, with maturity dates ranging from fiscal 2005 to fiscal 2010 (2001 – fiscal 2005 to fiscal 2010).

Redeemable by BC Hydro

BC Hydro debt of $97 million (2001 – $102 million), net of related sinking funds, with a coupon rate of 13.5 per cent (2001 – 13.5 per cent), is callable at BC Hydro's option on January 15, 2004 (2001 – January 15, 2004).

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Note 11: Financial Instruments

Fair Value

At March 31, 2002 and 2001, BC Hydro's financial instruments included temporary investments, accounts receivable and accrued revenue, sinking funds, accounts payable and accrued liabilities, accrued interest, accrued Payment to the Province, long-term debt, and interest rate and foreign exchange derivative financial instruments. Derivative financial instruments are held with the Province, which enters into such agreements with third parties on BC Hydro's behalf.

The fair value of BC Hydro's financial instruments approximates carrying amounts where applicable, except as shown in the following table:

(in millions)	**2002**		2001	
	Carrying Value[1]	**Fair Value[2]**	Carrying Value[1]	Fair Value[2]
Bonds, notes and debentures	**$ (7,795)**	**$ (8,527)**	$(8,037)	$(8,964)
Revolving borrowings[3]	**(184)**	**(184)**	(11)	(11)
Long-term debt before current portion	**$ (7,979)**	**$ (8,711)**	$(8,048)	$(8,975)
Sinking funds	**$ 1,073**	**$ 1,094**	$ 1,148	$ 1,170
Derivative financial instruments				
Net foreign currency contracts	**$ 16**	**$ 43**	$ 19	$ 47
Interest rate swaps	**–**	**(2)**	–	(4)

[1] *Carrying value represents the amount which is recorded in BC Hydro's financial statements. Bracketed amounts represent liabilities.*

[2] *Market rates and prices used in determining fair value are as of the closing balance sheet date.*

[3] *Due to the short-term nature of revolving borrowings, fair value approximates carrying value.*

Credit Risk Management

BC Hydro is directly exposed to counterparty credit risk as a result of the purchase and sale of electricity and natural gas by its subsidiary, Powerex. Powerex's principal markets for power marketing services are power exchanges, power pools, utilities and their affiliates in the western United States and western Canada. Powerex has concentrations of credit exposure to these parties throughout these regions. These concentrations of risk exposure may affect BC Hydro's overall credit risk in that certain Powerex customers may be similarly affected by changes in economic, regulatory, political and other factors. BC Hydro and Powerex manage credit risk by authorizing transactions with only credit-worthy counterparties as determined by BC Hydro Board-approved policies, and by monitoring the credit risk and credit standing of counterparties on a regular basis.

The rapid rise of wholesale power prices and in-state supply shortages caused significant financial hardship for a number of utilities in California during fiscal 2001. These utilities have defaulted on payments to the California Power Exchange (Cal Px) and the California Independent System Operator (Cal ISO). As a result of the payment defaults by these utilities, the Cal Px and Cal ISO have been unable to pay amounts owing to Powerex.

At March 31, 2002, the amount owing from Cal Px and Cal ISO was US $285 million (Cdn $454 million). A portion of this amount was not recognized as revenue due to market uncertainty. BC Hydro has recorded provisions for uncollectible amounts, which in management's best estimate are sufficient to provide for any remaining exposure.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

In addition, the State of California has requested the Federal Regulatory Commission (FERC) to consider whether refunds should be made to Cal Px, Cal ISO and the California Department of Water Resources by various suppliers, including Powerex (see Note 13).

Due to the instability in the California market and ongoing developments in regulatory and legal proceedings, management cannot predict the outcome, and the amount ultimately collected may differ materially from management's current estimate. As a result of defaults by the California utilities and certain related government action, management has not disclosed the provision amount or range of expected outcomes due to the potentially adverse effect on the collection process.

Note 12: Employee Benefit Plans

Employee Benefits

BC Hydro provides a defined benefit pension plan to virtually all employees. Pension benefits are based on years of membership service and highest five-year average pensionable earnings. Employees make basic and indexing contributions to the plan funds based on a percentage of current pensionable earnings. Annual cost-of-living increases are provided to pensioners to the extent that funds are available in the indexing fund. BC Hydro contributes amounts as prescribed by an independent actuary.

BC Hydro provides post-retirement benefits other than pensions including medical, extended health and life insurance coverage for retirees that have at least 10 years of service and qualify to receive pension benefits. BC Hydro also provides post-employment benefits other than pensions including the short-term continuation of health care and life insurance to terminated employees or to survivors on the death of an employee. Post-employment benefits also include the pay out of benefits that vest or accumulate, such as banked vacation.

Information about the defined benefit plans, post-retirement benefits and post-employment benefits other than pensions are as follows:

(a) The net expense for BC Hydro's defined benefit plans is as follows:

	Pension Benefit Plans		Other Benefit Plans	
(in millions)	**2002**	2001	**2002**	2001
Defined benefit plans	**$ 7**	$ 6	**$ 21**	$ 20

(b) Information about BC Hydro's defined benefit plans as at March 31, in aggregate, is as follows:

	Pension Benefit Plans		Other Benefit Plans	
(in millions)	**2002**	2001	**2002**	2001
Accrued benefit obligation	**$1,875**	$1,775	**$ 133**	$ 128
Fair value of plan assets	**1,906**	1,986	–	–
Funded Status-Plan surplus (deficit)	**$ 31**	$ 211	**$ (133)**	$(128)
Accrued benefit asset (liability)	**$ 79**	$ 61	**$ (31)**	$ (16)

No valuation allowance was required in 2002.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

(c) Included in the above accrued benefit obligation and fair value of plan assets at year-end are the following amounts in respect of plans that are not fully funded:

	Pension Benefit Plans		Other Benefit Plans	
(in millions)	**2002**	2001	**2002**	2001
Accrued benefit obligation	**$ 59**	$ 55	**$ 133**	$ 128
Fair value of plan assets	**–**	–	**–**	–
Funded Status-Plan deficit	**$ (59)**	$ (55)	**$ (133)**	$(128)

(d) The significant assumptions adopted in measuring the company's accrued benefit obligations are as follows:

	Pension Benefit Plans		Other Benefit Plans	
	2002	2001	**2002**	2001
Discount rate	**7%**	7%	**7%**	7%
Expected long-term rate of return on plan assets	**7%**	7%	**–**	–
Rate of compensation increase	**projected inflation + 1.5%**	projected inflation + 1.5%		

For measurement purposes, a 6% health care cost trend rate was assumed for 2002.

(e) Other information about BC Hydro's defined benefit plans are as follows:

	Pension Benefit Plans		Other Benefit Plans	
(in millions)	**2002**	2001	**2002**	2001
Employer contributions	**$ 24**	$ 20	**$ –**	$ –
Employees' contributions	**$ 13**	$ 9	**$ –**	$ –
Benefits paid	**$ 89**	$ 85	**$ 6**	$ 5

No amendments or curtailments occurred in the pension plans during the year.

Notes to Consolidated Financial Statements
For the Years Ended March 31, 2002 and 2001

Note 13: Commitments and Contingencies

Energy Purchase Commitments

BC Hydro has entered into long-term contracts to purchase energy to meet a portion of its expected annual electricity requirements. The minimum obligations to purchase energy under these contracts have a total net present value of approximately $7,563 million of which approximately $1,329 million relates to transportation contracts and the purchase of natural gas at market prices over 30 years. The remaining commitments are at predetermined prices.

Payments for the next five years are approximately (in millions): 2003 – $1,010; 2004 – $688; 2005 – $607; 2006 – $631; 2007 – $634.

Legal Contingencies

(a) Powerex, a wholly-owned subsidiary of BC Hydro, has been named, along with other energy providers, as a defendant in a number of lawsuits which allege that the California wholesale markets were unlawfully manipulated and that the energy prices were not just and reasonable. Estimates of claims against all of the market participants arising from alleged market manipulations range from hundreds of millions of US dollars to several billion US dollars. Several investigations and regulatory proceedings at the state and federal levels are also looking into the causes of the high wholesale electricity prices in the western United States. Due to the ongoing developments in regulatory and legal proceedings relating to the problems experienced in the California wholesale power market, management cannot predict the outcome of the various claims against Powerex. Powerex believes the terms of its sales were just and reasonable and do not reflect any alleged market manipulation or other unlawful market conduct. Powerex is vigorously defending itself against these claims and prosecuting its claims for unpaid accounts for power sales (see Note 11).

(b) On December 2, 2001, Enron Corp. (Enron) and certain of its subsidiaries filed for bankruptcy protection. As a result, the long-term Power Purchase Agreement between Powerex and Enron terminated. Under a 1997 agreement between Alcan, Enron Power Marketing Inc. (EPMI), Powerex and BC Hydro, Alcan agreed to remain liable to Powerex for the payment obligations of EPMI for which Alcan was originally responsible. Powerex has initiated a claim against Alcan amounting to approximately US $100 million in respect of the value associated with the future energy deliveries to Powerex required under the contract. At this time, the outcome of the claim is not determinable.

(c) Due to the size, complexity and nature of BC Hydro's operations, various other legal matters are pending. It is not possible at this time to predict with any certainty the outcome of such litigation. Management believes that any settlements related to these matters will not have a material effect on BC Hydro's consolidated financial position or results of operations.

Note 14: Revenues by Geographic Location

(in millions)	**2002**	2001
British Columbia	**$2,450**	$2,431
Rest of Canada	**192**	173
United States	**3,669**	5,285
	$6,311	$7,889
